WHO WE ARE

We collaborate with some of the world's largest and most experienced independent producers of natural stone, offering superior quality at the best prices. Armed with a wealth of expertise, our professional team can deliver stone products on any scale & requirements, providing meticulous attention to detail and an unparalleled commitment to quality.

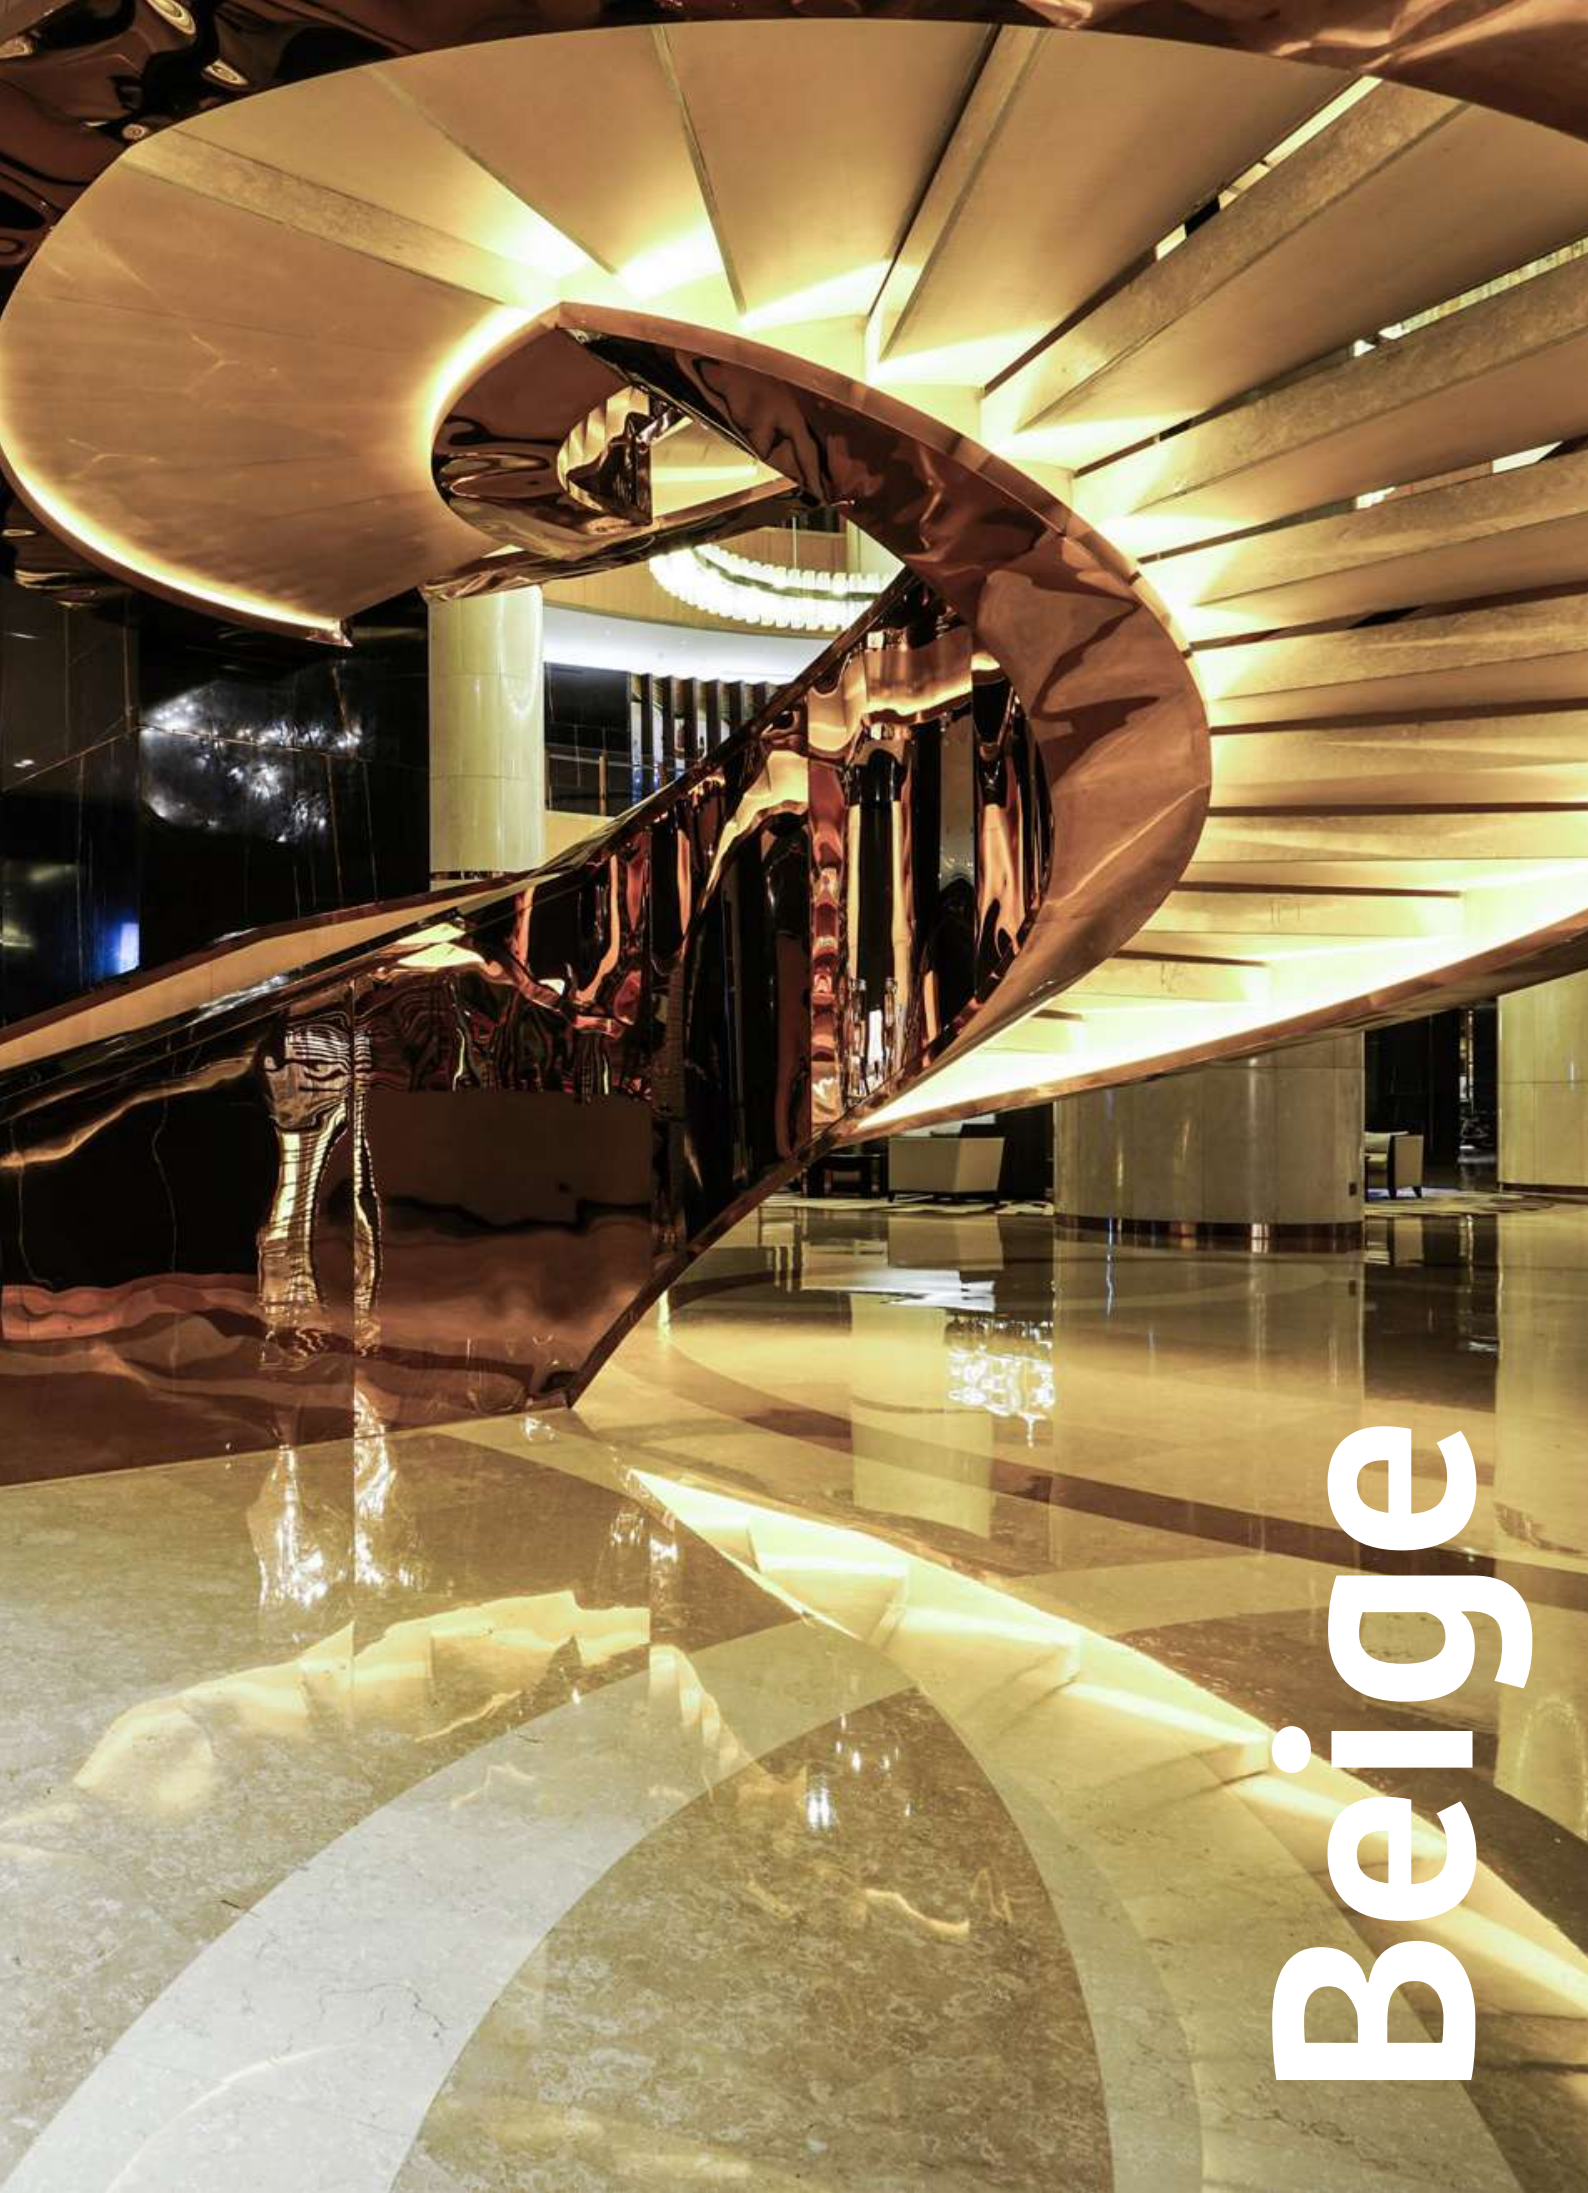

WHAT WE DO

We have an enviable track record of delivering a diverse range of products for clients who seek excellence and exclusivity. Understanding the challenges of Exporting & Importing foreign materials, we have strict control measures in place to ensure that everything we export meets both European Quality Standards and International Service Standards. Maintaining full control and accountability of the quality inspection process enables us to ensure that our customers receive only the finest quality products, giving them peace of mind that they will receive a premium standard every time.

WHY CHOOSE US

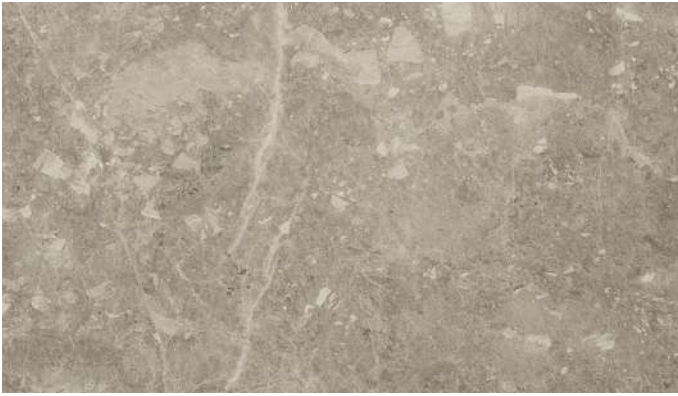

Steeped in a rich history that spans over 4,000 years, Turkey is home to a large proportion of the world's finest natural stone and marble. As a global exporter that works to international standards, we're adept in exporting premium Turkish marble and other natural stones on a global scale, without sacrificing premium standards. As natural stone isn't man-made, there are a range of variants to consider when it comes to quality control, including colour variation, defects and veining. Çınar Marble, we maintain full control and accountability of the quality inspection process with a team of directly employed experts who are dedicated to ensuring that customers receive only the finest quality products. We design, fabricate and export these materials while meeting International Quality Standard Assurance with both ISO9001 / ISO14001 certification. Our goal is to continue delivering high quality to an international client base at the most competitive prices.
